PROFESSIONAL SUMMARY

Compassionate and results-oriented nursing professional (BNSc candidate, University of Ibadan) with hands-on clinical experience across Medical, Paediatrics, Orthopaedics, and ICU wards at University College Hospital, Ibadan. Combines strong patient-centred clinical skills with technical proficiency in Python, AI tools (Claude/Anthropic), data handling, and digital documentation systems. Demonstrated ability to perform CPR in live settings, support multidisciplinary teams, and apply process optimization and data-informed thinking. Seeking roles that leverage clinical expertise alongside AI-enabled healthcare workflows, clinical decision support, health data tools, or digital health operations.

CLINICAL EXPERIENCE

Student Nurse – Clinical Rotations | University College Hospital (UCH), Ibadan

January 2024 – Present • Wards I worked in -: Medical • Paediatrics • Orthopaedics • ICU • Surgery • Burns Unit • Theatres

- Assisted nurses with comprehensive patient care and continuous monitoring across medical, paediatric, orthopaedic, and ICU settings.
- Supported patients with activities of daily living (ADLs): feeding, hygiene, comfort, mobility assistance, and repositioning.
- Performed CPR multiple times in live ward environments under clinical supervision, demonstrating readiness in emergency response.
- Participated in patient history taking, accurate clinical documentation, and multidisciplinary team collaboration.
- Assisted during labour and delivery procedures; provided postnatal care support for mothers and newborns.
- Measured and recorded vital signs and newborn anthropometric parameters (weight, height, head circumference).
- Maintained clean, organised, and safe patient environments in full compliance with infection prevention protocols.
- Collaborated with nurses, physicians, and allied health staff to support quality patient care outcomes.

EDUCATION

Bachelor of Nursing Science (BNSc) | University of Ibadan

Expected Graduation: 2027 • Concentration: Medical-Surgical Nursing | Maternal & Child Health | Community Health | Mental Health Nursing

Relevant Coursework: Foundations of Nursing • Human Anatomy & Physiology • Community Health Nursing • Maternal and Child Health • Clinical Nursing Practice

TECHNICAL & AI PROFICIENCY

Programming & AI Tools

- AI & Data Annotation
- Technical Writer
- Python – scripting, data handling, automation, and foundational work relevant to AI model interaction and clinical data workflows
- Anthropic Claude AI & large language models – practical proficiency in prompting, content generation, research synthesis, and workflow acceleration
- Version control & collaboration: GitHub, VS Code
- Familiarity with clinical documentation systems and basic Electronic Health Record (EHR) concepts

Clinical & Documentation Skills

- Vital signs monitoring & recording • CPR / Basic Life Support (practical experience in live settings) • Infection prevention & control
- Patient history taking, accurate clinical documentation, and medical record-keeping
- Microsoft Word & Excel for clinical and operational documentation
